

EMMA Dashboard

-- Graphical User Interface --

Description Overview

A GUI for clinicians that showcases participant data from the EMMA app.

Requirements:

EMMA Dashboard will need to have a way to connect to the EMMA participant database of which is coded using Access. It will need to know the identifications of the user, who should have access to a set of users, participants, they are looking after. The interface should be able to provide statistics, graphically represented, and overall numbers that the user would find pertinent to knowing.

Use-Cases

Pages:

- Browse Participants (filtered)
- Participant Overview
 - Overall data from app
 - Statistics
 - Graphs
-
